## **DETAILED ACTION**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. After entering the submission, claims 1, 4-7, and 14 are currently pending in the instant application, and are under examination on the merits.

### ***Response to RCE Submission***

#### **Claim rejection under 35 U.S.C. §112, 1<sup>st</sup> paragraph**

Applicants' submission of the required raw data of the X-ray powder diffraction spectrum of crystalline form of perindopril erbumine to demonstrate that Applicants were in possession of the instant invention overcomes the rejection. Therefore, the rejection is withdrawn.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 14 recites the limitation "said cardiovascular diseases are high blood pressure and heart failure" in claim 6. There is insufficient antecedent basis for this limitation in the claim, since no "cardiovascular diseases" are mentioned in claim 6.

***Claim Objection***

Claim 11 is objected to under 37CFR 1.75 as being a substantial duplicate of claim 1. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k). Recitation of an intended to use or utility in the preamble which can otherwise stand alone is not considered a further limitation of the claim and therefore cannot impart patentability to a known composition of matter. See, in re Spada, 15 USPQ.2d 1655 (Fed. Cir. 1990).

***Claim Objection***

Claims 6 and 14 are objected to under 37 CFR 1.75 as being a substantial duplicate of claim 5. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k). Claims 6 and 14 claim a solid pharmaceutical composition comprising a compound of claim 1, which is the same composition as claim 5, except containing a intend to use language. A product and is property is inseparable.

***Conclusion***

- Claims 1, 4-5, and 7 are allowed.
- Claim 14 is rejected.
- Claims 6 and 14 are objected to.
